Brett Yamada

brettyamada.com

Summary of Qualifications

- ✓ Excellence in both independent and fast paced, team-oriented environments
- ✓ Effective communicator, both written and verbal
- ✓ Adaptable programmer with experience in web development and OOP
- ✓ Outside thinker as a result of several iterative UX design processes

Education

University of Washington - Seattle, WA

GPA: 3.63

September 2011 to June 2015

Completed a degree in Informatics with a focus on human-computer interaction

Work Experience

Workday - Software Engineer I

August 2015 - Present

Architected and programmed backend object-oriented data models in Java to support talent management software packages. Responsibilities include creating user interface and web service flows to meet consumer business requirements.

Tyemill - User Experience Design & Development Intern

Summer 2014

Led design team in realizing and building a user experience around constructing, graphing, and comparing business portfolios. Internship included full stack exposure to Ruby on Rails MVC framework. Required deliverables: project charter, user stories, wireframing, functioning prototype due every two weeks, final business presentation.

Technology Background

Programming: 4+ years studying and creating several classes, ADTs, and other higher level functioning programs. Capable of run-time and data structure efficiency analyses.

Software Design: Background in information architecture and user experience. Experience in working with teams under iterative methodologies to create intuitive, usable interfaces.
